2 INSTALLATION STANDARDS FOR CCTV SURVEILLANCE, AND MONITORING SYSTEM

2.1 INSTALLATION GUIDELINES

2.1.1 SCENE AND ILLUMINATION

a) All cameras must be installed in the position where there are sufficient lighting levels to provide suitable quality footage. The service provider must inform RIM of the necessary lighting requirements.

c) Illumination over the scene being surveyed should be as even as possible avoiding any area of very low light illumination.

d) CCTV cameras should be mounted for optimal functionality and nothing should impair the camera picture quality. The preferred position for a light is above the camera. The camera should not view the scene through intense beams of light.

e) Particular attention should be given to the direction of illumination. The aim is to produce a maximum of contrast for intruder detection. An object can only be detected if its brightness is different to that of its background.

f) Prior to commencing work all Safety Requirements should be adhered to as per Health and Safety plan.
